

IRISH CATTLE BREEDING FEDERATION

€uro - Star Review.

21st August 2012.

Overview.

- Launch of new maternal & terminal indexes.
- Implementation plan.
 - Material.
 - Further research.
 - Roll-out plan.

Background.

- Euro-Stars introduced in 2007.
- Strong uptake, especially terminal traits.
 - 719k beef bull searches on ICBF website.
- Concern re: maternal traits.
 - Suckler Beef Value (SBV) was too heavily weighted on terminal traits.
 - No “obvious” index for breeding/selecting for maternal attributes (bulls and/or heifers).
- Major review initiated.

Outcomes of review.

- New economic values – based on Teagasc farm systems model.
- Removal of Suckler Beef Value (SBV) and replaced with 3 new economic indexes; (i) maternal, (ii) terminal & (iii) dairy beef.
- Removal of sub indexes and replaced with “key profit traits”.

New Euro-Star template

- Single template for industry.
- Used for;
 - Bull search
 - Sales catalogues.
 - AI brochures.
 - Euro-Star reports.
