

**Drystock Performance Report:
Herd Summary**

Herd Id: IE1234567

Name: JOE BLOGGS

Date: 29/11/2016

1. Summary Data: Basic Details

This report is based on all eligible drystock in your herd. Eligible animals include:

1. All non-pedigree registered beef males. 2. All non-pedigree registered beef females(not calved). 3. All dairy males

Note: All pedigree registered animals(males and females) are excluded from this report.

	All	Males	Females
Total Drystock	25	10	15
Average Age (mts)	10.1	6.5	12.5
No. with Liveweights	100%	10	15

	All	Males	Females
AI Bred	100%	10	15
Stock Bull	-100%	-10	-15
Unknown Sire	100%	10	15

2. Genetic Distribution Charts: Genetic makeup of your drystock herd on Commercial Slaughter Value (CSV)

The Commercial Slaughter Value is an index on the potential extra value of an animal at slaughter, above the average

The following pie charts give a breakdown of the CSV of the animals in your drystock herd. Each segment gives the percentage of animals of each star rating. The percentage of animals with no recorded sire is also displayed

1. Animal Details: This section lists each animals details along with slaughter value and any recorded on-farm liveweights

A Euro-Star Value in grey indicates an animal in the bottom 20% of your drystock herd based on CSV.

ADG = Average Daily Gain. In each case the ADG is from the previous recorded liveweight.

1. Males 0-1 Yr Old (10 Animals)
