

ICBF Weekly Update 15th March 2013

1 Important Dates

-  **ICBF Board Meeting** – Thursday 28th March, 10:30 to 14:00, Maldron Hotel, Portlaoise.
-  **Sheep Ireland Board Meeting** – Thursday 28th March, at 14:00, Maldron Hotel, Portlaoise.

2 ICBF HerdPlus/GEN€IR€LAND Dairy User Day and Charity Auction – Corrin Mart 20th March

FBD Trust, ICBF and the Bottom-Line Discussion Group, have joined forces to offer a unique event,  which will include the annual ICBF HerdPlus/GEN€IR€LAND dairy user day, followed by a

Charity Auction of €200 EBI Heifer Calves. The event will take place in Corrin mart, Fermoy on Wednesday 20th March from 10 AM to 1 PM. Charities involved in the initiative will include; Barretstown, Irish Association of Suicidology, Fermoy Sub Aqua and Rescue Club and Simon Community. Already 24 heifer calves have been donated including 11 from Bottom-Line discussion group members (*See Table 1 attached*). All of the calves are born prior to 28th February and have 2 generations of ancestry. Average EBI for the calves entered to-date is €11, making it the highest EBI sale to have ever taken place in Ireland. In addition, photos and details of the calves are available to view online at the following link <http://www.farmersjournal.ie/toplink> - Search for

“Charity”

If you are interested in attending the event, please contact ICBF HerdPlus on 1850 600 900 or text Corrin to 089-4577663.

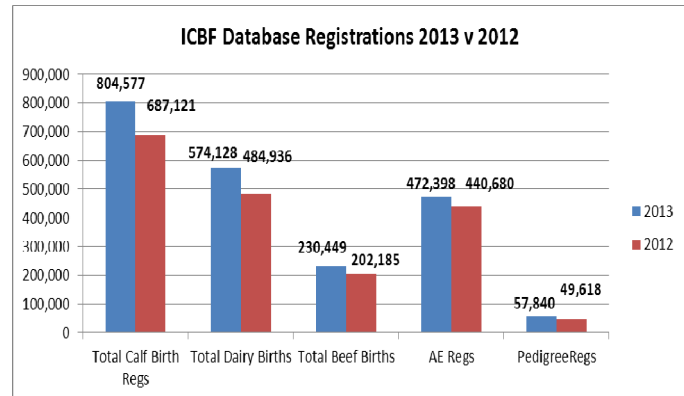

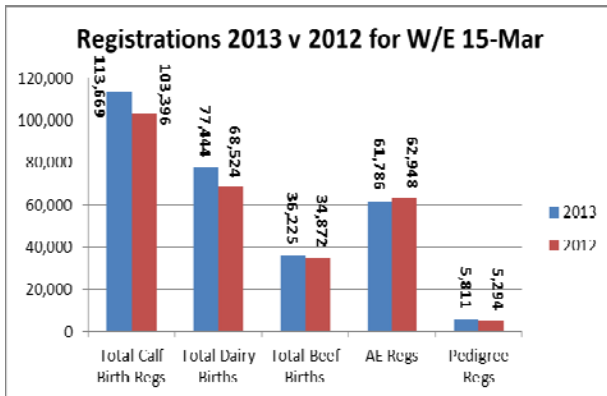

Pictured at the launch of the event are; Sean Coughlan, CEO ICBF, Jim Cleary FBD Insurance, Mary McCarthy, ICBF GEN€IR€LAND and Willie Kingston, member of the Bottom-Line Discussion Group.

The program for the event is as follows:

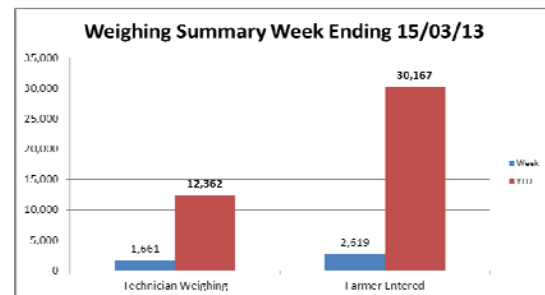

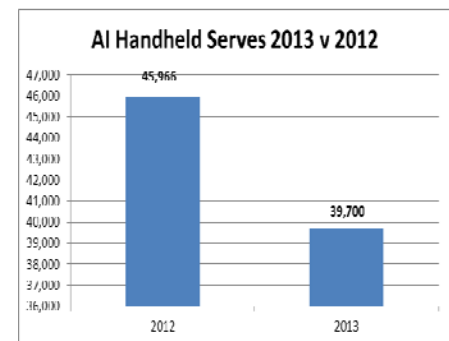

- 10.00 – 10.30** Tea & coffee.
- 10.30 – 11.00** ICBF HerdPlus update, with a specific focus on the following initiatives for 2013; (i) weight recording service, (ii) discussion group reports (iii) health & disease reports, and (iv) Innovation competition for discussion groups, in conjunction with ACC bank, Teagasc and Irish Farmers Journal.
- 11.00 – 11.30** GEN€IR€LAND breeding program update, with a specific focus on the following initiatives for 2013; (i) bull mother program, (ii) sexed semen field research trial and (iii) genomics for females project.
- 11.30 – 12.00** FBD Trust GEN€IR€LAND Awards, for the top bull breeder and data recording herds.
- 12.00 – 1.00** Charity Auction of high EBI heifer calves, held in conjunction with the ‘Bottom-Line’ Discussion group.
- 1.00 – 2.00** Complimentary lunch sponsored by FBD Trust.

Please see catalogue attached.

3 Database

- The stats above are compiled with the assistance of DAFM AIM systems.
- In the Suckler scheme, the number of 2012 born calves with meal introduced is 592,335 with the number of animals weaned at 516,487.
- BVD test results continue to be received at ICBF and are being processed accordingly. There have been 763,000 results received since January 1st, of which 120,000 have come in the last 7 days. Since the beginning of the voluntary phase in 2012 1.25 million results have now been received.
- The graph above shows Inseminations recorded on AI Handhelds in 2013 compared with 2012.
- This week there were 1,661 weights received through the technician service and 2,619 weights recorded by farmers. The graph shows the week and year to date totals.

4 Tully

Current intake of commercial progeny (59 commercial bulls)

- This week saw the second batch of commercial progeny complete their 90 day performance test at the GEN€ IR€LAND progeny test center, Tully, Co. Kildare. The group consisted of 59 bulls born between 1st October and 30th November 2011. All 59 bulls were weighed on Monday of this week and had an average live-weight of 694 kg.
- During the performance test information such as average daily gain, feed conversion efficiency, scanned muscle and fat depth measurements along with scrotal circumference size was collected on each animal. Each of the bulls were also genotyped.
- Following the completion of the test, 26 of the 59 bulls were slaughtered at Slaney Foods, Bunclody, Co. Wexford on Tuesday of this week. The remaining 33 bulls will be slaughtered on 20th March 2013. All bulls were weighed prior to slaughter and the average kill-out for the group was 58%. Kill-out ranged from 54 to 63 percent. The 26 bulls slaughtered had an average carcass weight of 433 kg. Carcass weight ranged from 284 kg to 478 kg. 6 of the 26 bulls slaughtered graded a carcass conformation score of E, with 19 bulls grading a carcass conformation score of U and one bull grading an R.

- Similar to the 77 bulls slaughtered in late 2012, carcass and meat eating quality data was collected in collaboration with Teagasc on each of the 26 bulls. Also, as part of quantifying meat eating quality the striploin from the right hand side of each carcass was retained for more in-depth analysis. Some of the information collected at the factory and subsequent analysis of the striploin that will take place includes the following:

Data collected in the factory includes:

- Primal yields (British spec)
- 9 hourly PH measurements of the carcass/striploin
- NIRS spectra images at 4-6 points on the carcass

Analysis that will be carried out on the striploin of each animal includes:

- Colour of loin
- Visual marbling of the loin
- Composition analysis – Intramuscular fat %, protein % & moisture %
- Cook loss and shear force measurements
- Two to three samples of the striploin will be archived for potential sensory and tenderness analysis.

Latest commercial progeny on test (50 commercial bulls)

- 50 commercial bulls born between 1st December 2011 and 31st January 2012 started their performance test this week. The 50 bulls were weighed on Monday and had an average live-weight of 498kg. They will finish their performance test on 10th June.
- Up to now these animals had been acclimatised for 30 days. During this period they are built up onto an ad-lib concentrate diet and receive their vaccinations for IBR, RSV, PI3, Pasteurella (strains of pneumonia), Blackleg and various other clostridia diseases. They are also treated for lice, mange, immature and mature fluke, stomach and lung worms.

New intake (65 commercial bulls)

- 65 commercial bulls born between 1st March 2012 and 30th April 2012 have recently being purchased. The average weight of the new group of progeny is 430 kilos. These animals will be acclimatised for 30 days prior to the start of their 90 performance test. The 65 bulls were selected based on the following criteria: (i) sired by GENÉIRÉLAND AI sires or proven AI bulls, (ii) age, (iii) gender, (iv) recorded sire and maternal grand sire (vi) passed BVD and T.B test on-farm.

5 Sheep Ireland

- Over the course of the past week the Sheep Technology Adoption Programme (STAP) has been high on Sheep Ireland's agenda. STAP applicants have started their meetings and are now in the process of choosing their 2013 Tasks to meet the criteria for payment under the programme later in the year.
- Teagasc sheep advisors came together this week to get updates on all tasks and administrative requirements for the programme. Sheep Ireland was present at these training days to detail exactly what is involved with Tasks 1 & 2 of the scheme. The success of the scheme will depend hugely on the role that every facilitator plays with their respective groups and we will make every effort in the coming months to support these advisors and their clients.
- Sheep Ireland will have a huge workload in the coming months to successfully coordinate and validate tasks 1 & 2 for all participating STAP flocks and engaging with all STAP applicants will be a mammoth task, but one which offers our breed improvement scheme an amazing opportunity for further growth.

PZB	Bonaparte	SA	120
QCD	Cloondroon Calling	SI	165

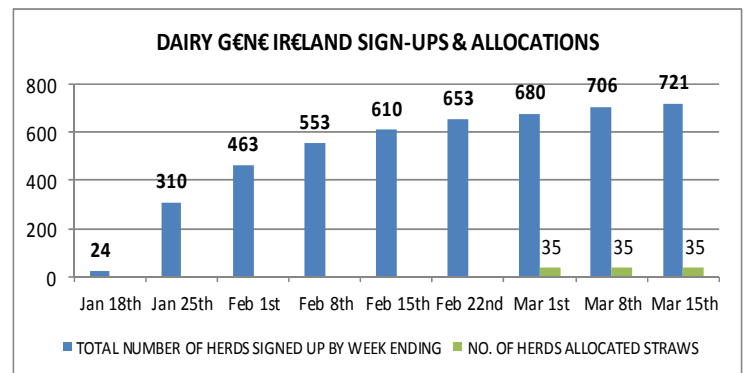

- ✚ Sign-ups are continuing for the GENÉIRÉLAND spring program.
- ✚ 112 herds taking a total of 2190 straws have signed up so far.
- ✚ WLZ has this week become the 19th Limousin bull to be tested through the program.
- ✚ To learn more or to sign up please phone **1850 600 900** or **045 521573**.
- ✚ The approximate total straws ordered per bull so far are detailed in the tables 1 & 2.

Table 2. List of Terminal Bulls currently on-test

Code	Name of Bull	Breed	Straws
ZSD	Serpentin	BB	65
FSN	Folon	BB	45
GLP	Galopeur	BB	25
FFK	Conval Frank	CH	125
FGG	Leagaun Figaro	CH	105
FZM	Lenagh Equaliser	LM	50

Dairy

- ✚ 721 herds are signed up taking a total of 24,867 straws. We have stopped signing up herds due to unprecedented demand, relative to the number of bulls with semen available. If you wish to join the programme please call us on **1850 600 900** and we will facilitate you in the event of any additional allocations becoming available.
- ✚ The average EBI of the Holstein-Friesian panel is **€75**.
- ✚ Allocations will increase in the coming weeks as straws become available.

7 Genetic Evaluations

- ✚ Routine evaluations are currently underway. Files are due to be sent to Interbull on Tuesday.
- ✚ Weekly genomic evaluations are continuing. The current time taken from receipt of hair sample to a result is 23 days, the same as last year. The time taken for a farmer to return the sample is about 6 days down from 12 days last year. We are currently providing results for about 800 animals per week.
