

**Autumn 2023**

# **Gene Ireland Beef Sire Directory**

# Introduction

We are delighted to present you with the latest catalogue of beef bulls that are now available through the Gene Ireland program. The breeding program is a joint initiative between Pedigree Breeders, Commercial farmers, Breed Societies, AI Companies, DAFM & ICBF. The aim of the program is to progeny test high index beef bulls which will produce profitable cows for the suckler beef industry. The minimum criteria for a bull to be included on the panel is 5 Stars across breed on Replacement Index.

We have included a section dedicated to high Terminal Index bulls which are selected to produce profitable animals for sale or slaughter. The minimum criteria for a bull to be included in the Terminal section is also 5 Stars across breed on Terminal Index.

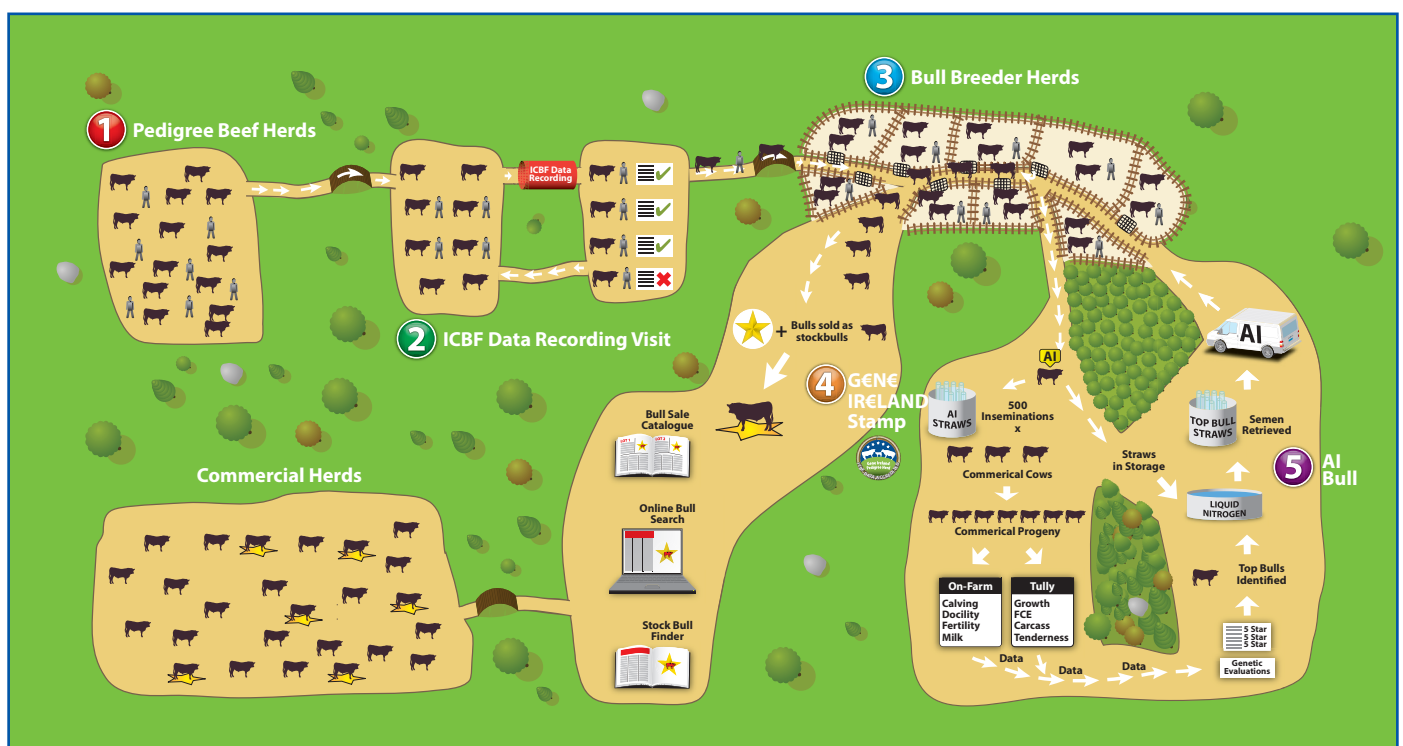

## The Benefits

If you contact ICBF (023-8820452) and order semen from any of the bulls in this catalogue you will receive the following benefits:

- ❖ Access to the highest index new beef bulls in Irish AI at €7 per straw (technician charges may apply).
- ❖ Straws delivered to your own tank or the technician of your choosing.
- ❖ Progress towards meeting SCEP scheme targets.
- ❖ Potentially sell some of the progeny back to ICBF for performance testing at the Tully Beef Test Centre.
- ❖ Freedom to choose whatever combination of bulls & breeds that you require from the catalogue.

## Gene Ireland Overview

The diagram below gives an overview of both the design and operation of the Gene Ireland Beef program.

## Spring 2023 AI Birth Stats

# The class of Spring 2023, who sired them?

The first half of 2023 saw 594,950 suckler beef calves (beef sire x beef dam) born on Irish farms, of which 86,670 have been registered to an AI sire. This represents approximately 15% of all suckler beef calves born in the period. Below is a list of the Top 10 AI sires of Spring 2023 born suckler progeny based on sires recorded.

**The Top 10 AI Sires with the most progeny recorded to them between 1/1/23 to 30/6/23.**

Rank	AI Code	Name	Breed	Number of Progeny	Repl Index	Term Index	GI Sire
1	CH4321	Lapon	CH	7998	€90	€160	Yes
2	LM2014	Ewdenvale Ivor	LM	6174	€169	€152	Yes
3	LM4217	Moondharrig Knell	LM	3992	€169	€119	Yes
4	CH4160	Pottlereagh Mark	CH	2104	€145	€139	No
5	CH7503	Cloonradoon Ricky	CH	2068	€65	€123	Yes
6	LM4184	Loyal	LM	1984	€154	€130	No
7	LM7416	Powerful Proper	LM	1965	€116	€113	Yes
8	AA4640	HW Farghal	AA	1870	€119	€89	Yes
9	CH4159	Knockmoyle Loki	CH	1854	€121	€163	No
10	BB4438	An De Beauffaux	BB	1723	€69	€137	No

*Evaluation based on the Sept 2023 evaluation.*

These 10 sires account for 36% of all the AI suckler progeny born in the first half of 2023. The list is dominated by well proven Charolais and Limousin sires along with one Angus and one Belgian Blue. The 10 sires listed above have an average Replacement Index of €122 which is **5 Stars** across breeds with relatively high reliability across all the sires and very high in some cases.

Encouragingly, 6 of the 10 sires, and all the top 3, listed above have graduated from Gene Ireland over the years which highlights the value of the programme for progeny testing young high impact sires. This helps to drive the rate of genetic gain by building high reliability indexes at a young age on the back of robust data recording. Every Spring and Autumn a new panel of young high genetic merit AI sires are made available to suckler farmers for just €7 per straw.

## Gene Ireland User Profile

The Lenehan family operate a mixed suckler and sheep enterprise near Duleek in Co Meath. The farm was bought by Pats grandfather in the 1870s and Paul is now the 4<sup>th</sup> generation of Lenehans on the property. 70 cows are calved in a 50:50 split between spring and autumn with replacements bred from within the herd. The suckler enterprise is run alongside a flock of 200 ewes. Approx 80% of the calf crop are sired by AI each year. The main breeds used are Charolais, Limousin and Simmental with Hereford used on maiden heifers. Most animals are brought to finish and then either sold to the factory or in the mart depending on the market conditions at the time. The Lenehans have also sold several batches of Gene Ireland sired animals to ICBF for the Tully Test Centre over the years.

Pat and Paul Lenehan

The average Replacement Index of the cows in the herd is an impressive €109 - this compares to the national average of approximately €89. This high level of genetic merit is backed up with a hugely impressive set of KPIs for such a large herd. The most recent figures for the herd indicate an average calving interval of just 367 days with calves per cow per year running at 1.04. The herd are also active participants in HerdPlus, Gene Ireland, SCEP and NGP.

The Lenehans have been using Gene Ireland straws since the programme began back in 2007. The use of these Gene Ireland bulls forms a key part of the annual breeding plan on the farm. One of the most successful sires used over the years is Fabb 1 Northern Star (HE4297) with several of his daughters retained in the herd. Paul has found that this bull ticks all the boxes for him in terms of high index, easy calving, docility, milk and fertility. All the essential ingredients in a profitable suckler cow.

One of the standout cows in the herd is tag 945. Sired by the Gene Ireland legend SI2152, she was born in 2017. This cow first calved at 30 months and has produced a calf each year with a lifetime average calving interval of just 364 days. Her 2023 born calf was a bull sired by the Gene Ireland bull CH5626(Love P). Her first four calves were heifers - all of which have been retained in the herd. Her 2022 born heifer was sired by yet another Gene Ireland bull - CH6490. This calf weighed 377 kgs at 256 days which calculates into a most impressive 1.29 kgs per day. The cow herself currently has a Replacement Index of €172 and weighed 690 kgs when last weighed. She is 5 stars across breed for Milk and Fertility and is yet another example of what can be achieved in the suckler industry through a combination of elite genetics and top-class management.
