Dairy Cow Calvings and Dairy*Beef Births ('000)

The Dairy Beef Index (DBI)

$$\text{DBI} = \text{Calving Merit} + \text{Beef Merit} + \text{Carbon Merit}$$

- Dystocia
- Gestation
- Stillbirth

- Feed intake
- Docility
- Carcass weight
- Carcass conformation
- Age at slaughter
- Factory-specification
- Polled
- TB
- Carcass weight
- Age at slaughter
- Gestation

DBI = Traits relevant to breeder & rearer/finisher

What's needed when using beef sires

Herd EBI Scorecard

Genotyped 2023 born male

Active AI sires

Sire Advice

1. Farmer chooses sires and usage rates

- Farmer chooses females for dairy, beef, culling, crossbreeding....

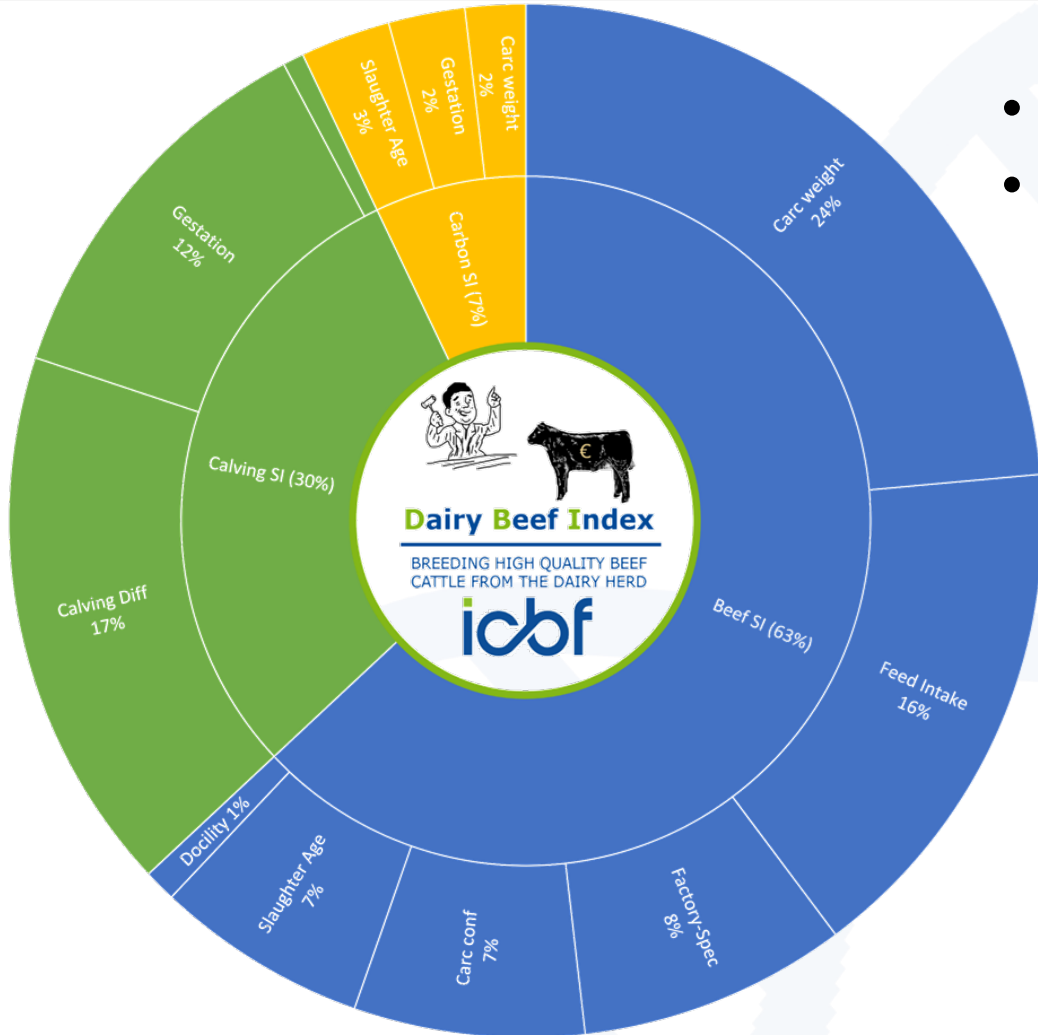

2. algorithm factors in:

- Female predisposition to difficult calving + sire's calving difficulty genetic merit
- Matching beef merit

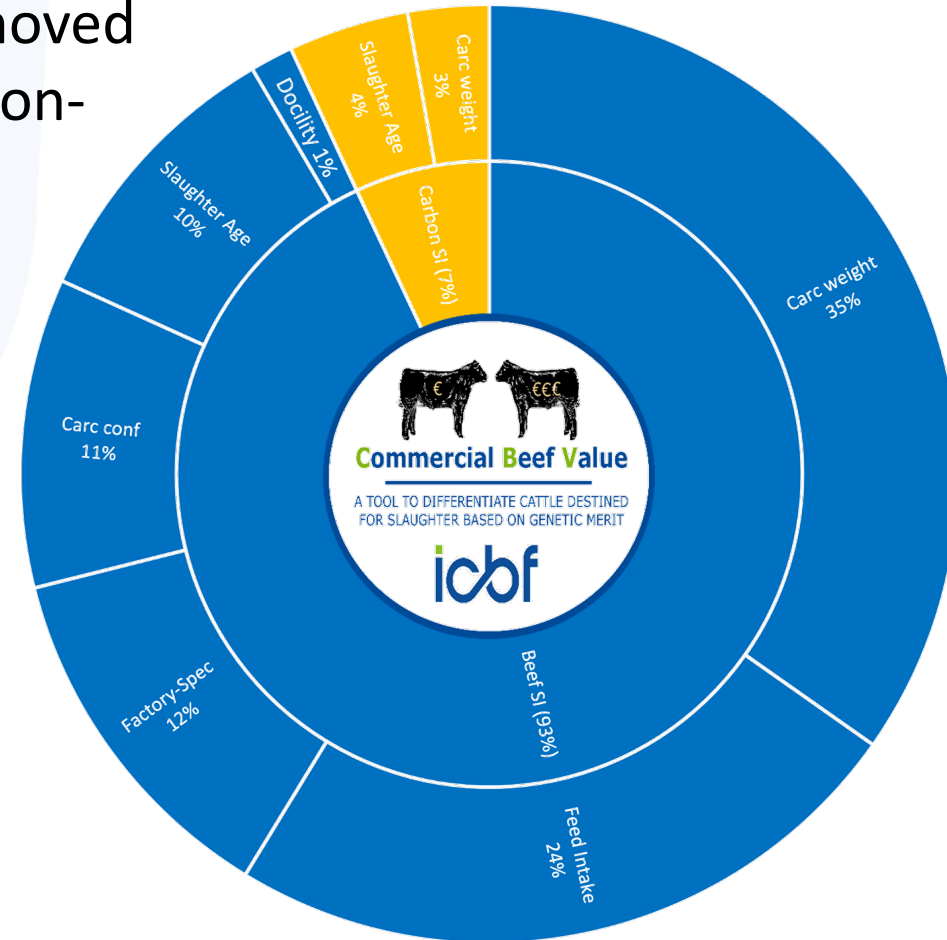

3. Farmer can save on database and send to technician handheld

4. 42% of cows were put through Sire Advice in 2024

Calf on the ground: Commercial Beef Value (CBV)

- Calving traits removed
- Not needed for non-breeding animal

Does CBV work?

62k AA*HF steers finished so far in 2024
Association with CBVs generated Dec 2023

Star Rating	count	Genetic prediction Prior to slaughter (EBVs)				Phenotypic Performance			Price	
		CBV (€)	Age at Finish (days)	Carcass weight (kgs)	Conf (1-15)	Age at Finish (days)	Carcass weight (kgs)	Conf (1-15)	Calf price (€)	Factory Price (€)
5	12,495	€119	1.1	6	0.49	794	320	5.46	€215	€1,738
1	12,507	€36	3.4	-9	-0.10	821	308	5.04	€170	€1,657

Financial Incentive to Use Better DBI Bulls

Objective:

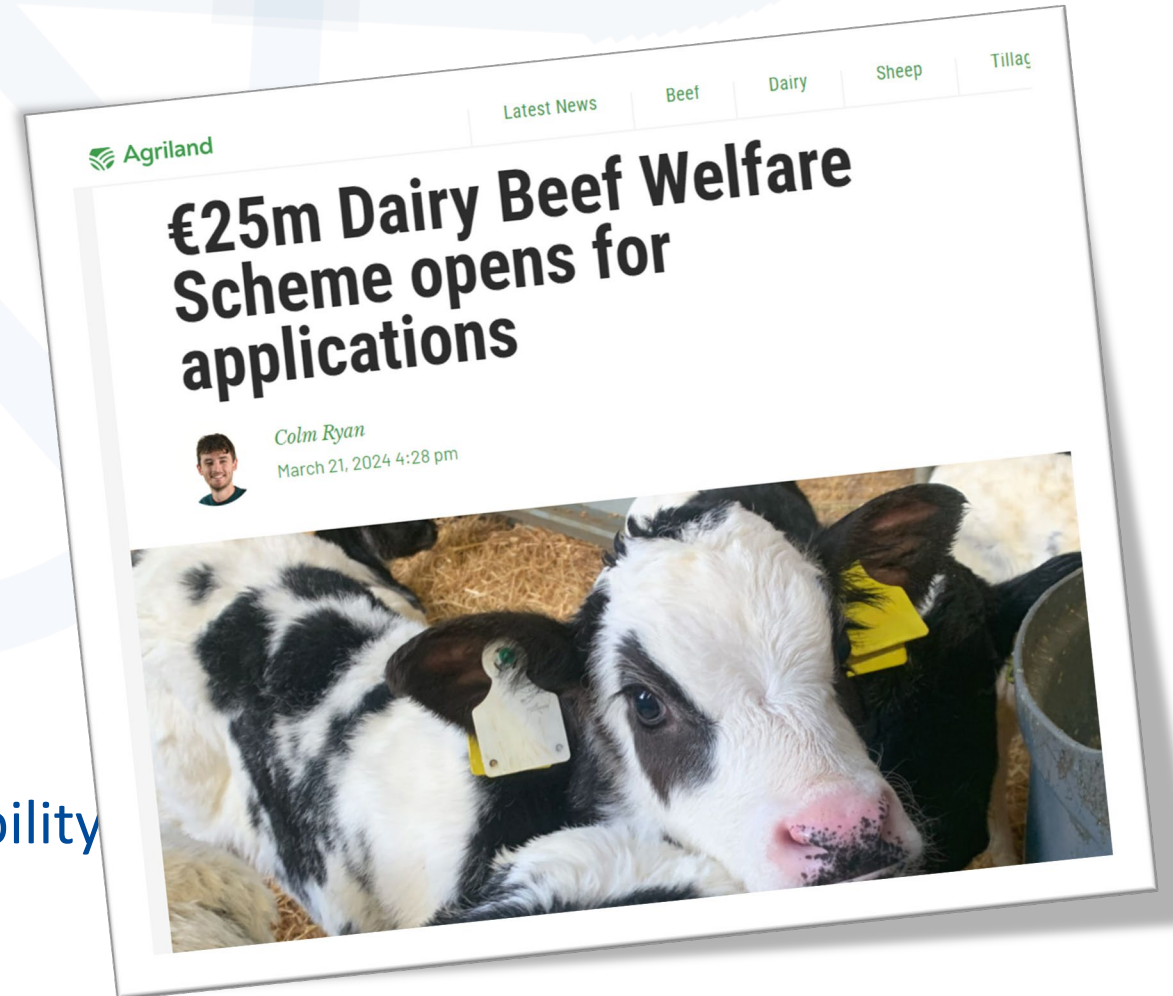

- Improve genetic merit of beef sires used

Requirement:

- Use a beef bull that is:
At least 3* on Dairy Beef Index
and
At least 3* on Beef Sub-Index of the DBI

Payment:

- €20 per eligible calves (max. 50 calves)
- Some Coops now factoring DBI into Sustainability Bonus

Summary

- Use the DBI to identify suitable beef bulls
- Easy calving bulls, with short gestation and high beef merit are available
- New scheme launched to financially incentivise use of superior beef bulls
- Trading now influenced by CBV on mart boards
- Steps to achieving the best beef bulls for your herd, and maximise CBV of calves
 1. Choose an acceptable calving difficulty range for the right cows (1st calvers vs mature)
 2. Maximize the Beef Sub-Index of the DBI
