**PRIVATE PROPERTY: NO CARS WILL BE PERMITTED ON FARM**

**2.00pm: Arrive at host farm:**

**Chair: Christy Watson, Irish Grassland Association Council Member.**

- Financial and physical performance of the farm
- Grazing in excess of 70 cattle in one single group
- The suckler herd performance (90 cows and calves plus 4 bulls in one group)
- Animal health

## The O'Connor Farm

The O'Connor family farm near the Village of Moone in South Kildare. The farm is run as a partnership by Monica, Tom and their son Thomas, this is a truly mixed farm with four enterprises on the farm comprising Beef, Sheep, Tillage and Pigs.

In 2015 Thomas was the winner of the FBD Young Beef Farmer of the year competition. The beef enterprise will be focused on during the farm visit, comprising 90 Suckler cows with all male progeny finished as bulls under 16 months and heifers at 21 months. Each year 200 additional cattle are purchased for finishing comprising both young bulls and heifers. The unique feature of this farm is the way the O'Connor's paddock graze the cattle in large groups during the grazing season. The 90 suckler cows and four breeding bulls are grazed together as one group in two hectare paddocks, up to 77 young bulls have been grazed in one group for the grazing season, and up to 100 heifers are grazed together in one group. Grassland management is excellent with all the farm laid out in 2 ha paddocks, with the provision for subdivision of all paddocks. The three pillars supporting excellent output are to be seen on this farm namely, Breeding, Grassland Management, Livestock Management.

The O'Connors are achieving an annual stocking rate of 3.3 livestock units per ha and a beef output of 1,498 live weight per hectare, grass utilised in 2017 was 11.5 tonnes of dry matter per hectare.

## Conference Speakers

### Ger Dineen, Beef Farmer.

Ger Dineen is farming in Kilnamartyra, Macroom, Co Cork. Gerard is a suckler farmer finishing all bulls to beef. In 2017 he had 60 cows and 15 in-calf heifers. He farms full time on 31ha, 10ha of this is an out farm. Farm output is high at 999kg liveweight per hectare. Ger was Beef Enterprise award winner Grassland farmer 2017.

### Dr. Donagh Berry, Statistical Geneticist at Teagasc, Moorepark.

Following his Ag Science degree at UCD, he undertook a PhD in dairy cattle genetics in Wageningen University, the Netherlands.

He is responsible for the research on national genomic evaluations in dairy cattle, beef cattle and sheep in Ireland.

### Dr. Patrick Wall, Professor Public Health UCD.

Dr Patrick Wall is Professor of Public Health in University College Dublin's School of Public Health. He is a vet and medical doctor and runs a one health program in UCD and on the UCD branch campus in Malaysia. His teaching and research interests include food borne diseases, lifestyle related diseases and health damaging consumer behaviour.
